

Chayada Pakpoomkamonlert

BSc (Hons) Computer Science, PolyU — Focus: Full-Stack Software Development, Game Development

📍 HK (+852) 5636-6434 📍 TH (+66) 86-735-5160 ✉ cchayadapak@gmail.com

🌐 cchayadap.github.io/portfolio 🐙 github.com/cchayadap 🌐 linkedin.com/in/chayada-pakpoomkamonlert-3079a4318

Skills

Programming Languages: C, C++, C#, Python, Java, JavaScript, TypeScript, SQL, PL/SQL, Lua

Web & Frameworks: HTML, CSS, React, Next.js, TanStack Query, Tailwind CSS, FastAPI, SQLAlchemy, Alembic

Tech & Tools: PostgreSQL, Redis, Docker, AWS S3, Vercel, Git, Gemini API, Unity, Godot, Oracle APEX, CoppeliaSim, SolidWorks

Languages: English (Fluent), Thai (Native) **Additional:** Graphic Design, Mathematical Modelling, AI Data Annotation

Education

The Hong Kong Polytechnic University

2024–2028

BSc (Hons) in Computer Science: Tuition Scholarship

- Cumulative GPA: 3.55 / 4.30 (Years 1–2)
- Dean's List, Dept. of Computing & Faculty of Engineering, AY 2024–2025

Auckland University of Technology

Feb–Jun 2026

Exchange Semester, Computer Science: Tuition Scholarship

- GPA: 8.25 / 9.00 (All A-Range)
- Coursework: Networks & Internet, Operating Systems, HCI, Computer Graphics Programming

Internship & Research Experience

Gosoft (Thailand)

Jul–Aug 2026

Full-Stack Software Engineer Intern — Retail Unit, Product Data Management

- Developed a Product Data Management (PDM) database for 7-Eleven Thailand, used across the retail unit's internal workflows.
- Identified and resolved 100+ UI/UX defects in the PDM application through systematic testing, improving application reliability.
- *Tools:* Oracle APEX, PL/SQL, HTML

Vidyasirimedhi Institute of Science and Technology (VISTEC)

Jun–Aug 2024

Research Intern — BRAIN Laboratory, School of Information Science and Technology

Research: Self-Organized Stick Insect-Like Locomotion under Decentralized Adaptive Neural Control

- Modelled how sensory input shapes motor output via Central Pattern Generator pathways, from stick insect leg and neural data.
- Built a CoppeliaSim locomotion simulation, tuning learning rates of a Radial Basis Function network to improve training.
- *Tools & Methods:* CoppeliaSim, Lua, Python, Neural Networks, Motion Tracking

Kamnoetvidya Science Academy

2022–2024

Student Researcher — Mathematics

Research: The System's Behavior of a Certain Type of Piecewise Linear Difference Equations

- Solved piecewise linear difference equations to characterize the recursive behavior of system solutions.
- Presented at the Annual Pure and Applied Mathematics (APAM) Conference 2023 and KVIS-ISF 2024. (*Python*)

Projects

Wreckabulary (github.com/cchayadap/wreckabulary)

Sep 2026–Present

COMP4122 Group Project — Main Designer & Core Developer

- Developing a 2–4 player local-multiplayer party brawler where players smash furniture into letters and spell words to summon objects; 4 modes incl. co-op and a creative sandbox with JSON room saves.
- *Tools:* Unity 6 (URP), C#, Unity Input System, Git LFS

ScenarioLab (scenariolab-nu.vercel.app)

Sep 2026

General Learning Hackathon 2026 — Main Designer & Core Developer

- Built an EdTech tool that turns lectures (PDF/PPTX) into workplace scenarios; students design a solution as text or a flowchart and an AI “senior” grades it against a rubric over 3 revision rounds.
- Developed Gemini-powered API routes for scenario generation, grading, hints and mentor chat, with input filtering against prompt injection.
- *Tools:* Next.js 14, React, TypeScript, Tailwind CSS, Google Gemini API, Mermaid.js, React Flow, Vercel

KVIS-Connect (kvis-connect.com)

Apr–Jul 2026

Co-founder, Designer & Full-Stack Developer

- Co-founded a networking platform for Kamnoetvidya Science Academy alumni, students and staff to connect and share research interests, featuring an interactive 3D globe mapping alumni worldwide.
- Grew the platform to 169 registered users within the first month of launch; presented at KVIS Homecoming 2026.
- Backend: FastAPI, PostgreSQL (SQLModel, Alembic), JWT + OAuth login, S3 uploads, Redis, scheduled jobs, Docker.
- Frontend: Next.js, TypeScript, TanStack Query, React Hook Form + Zod, Radix UI, Tailwind CSS, three.js.

Assistive Hardware Projects: Electric Bed & EMG Wheelchair Control

2022–2023

Biomedical / Embedded Systems

- Engineered a force-sensor electric bed with Bluetooth-microcontroller safety features (TIA2023, Samsung Innovation Thailand 2023) and an EMG muscle-signal wheelchair control framework (TJ-SIF2022; SCB Challenge semi-finalist).

Extracurricular & Leadership

- **Marketing & PR Executive Committee, PolyU Thai Student Association (2025):** Ran marketing and outreach for 5+ events, including the Loy Krathong Festival, co-organised with the Association of Thai Students in Hong Kong and Macau (ATSHM).
- **Media Team Contributor (2021–2025):** Instagram co-admin for KVIS-ISF and KVIS Art Festival; news writer covering KVIS-ISF (2022, 2023); English-Thai translator for Khan Academy Club (2021).
- **Vice President & Founder, Japanese Culture Appreciation Club (2023)** • **Student Council, Long-Term Plan Division (2021)**

Achievements, Awards & Scores

- **Thailand-UK Python+Astronomy Summer School (2022):** Distinction • **CANSAT-ROCKET (2022):** Finalist
- **Asia-Pacific Linguistics Olympiad (2023):** National Contestant • **IELTS 7.0** • **SAT 1420 (Math 790)**
